RESEARCH EXPERIENCE

Woods Hole Oceanographic Institution

Graduate Research Assistant

Sep 2021–Present

Woods Hole, MA

- Designed physics-based (MITgcm) and Bayesian models to test hypotheses of mechanisms controlling deep ocean circulation and heat content data sparse regions.
- Evaluated high-resolution coupled climate models to quantify the impacts of Antarctic sea ice melt on deep water formation and interior tracer distributions.
- Used ocean reanalysis and satellite products to establish a statistical relationship between remotely-generated near-shore sea surface temperature variability and extreme precipitation events in California.
- Developed Python and Julia tools to process, visualize, and interpret tens of terabytes of climate data in high-performance computing environments.

Foundation for Resilient Societies

Technical Consultant

Jan 2025

Cambridge, MA

- Ran and debugged Strategic Energy & Risk Valuation Model (SERVM) simulations to assess adequacy of U.S. electrical grid capacity under varying generation scenarios (e.g., solar adoption).
- Led a team of 12 undergraduate electric grid modeling interns to develop an internal user guide for running SERVM experiments and interpreting model output.

Los Alamos National Laboratory

Research Intern

Jun 2021–Aug 2021

Los Alamos, NM

- Implemented and evaluated reduced-precision in the Energy Exascale Earth System Model (E3SM) to reduce computational cost and energy consumption in global climate simulations.

Institute for Pure and Applied Mathematics & The Aerospace Corporation

Research Intern

Jun 2020–Sep 2020

Los Angeles, CA

- Designed and implemented reinforcement learning-based methods for adaptive packet routing in satellite network simulations, implemented using PyTorch.

TECHNICAL PROJECTS

xndbc

Personal Project

In development

github.com/anthony-meza/xndbc

- A Python package to query, subset and process data from the NOAA National Data Buoy Center (NDBC) and store them as xarray objects.

Atmospheric Physics using AI

Kaggle Competition Participant

Apr 2024–Jul 2024

Remote

- Ranked 70th percentile on the public leaderboard for emulating subgrid-scale atmospheric processes.
- Developed machine learning architectures with physical constraints in PyTorch and TensorFlow.
- Optimized data pipelines for GPU-accelerated training, significantly increasing model throughput.

INVITED TALKS

- "How the Ocean Redistributes Heat"

May 2026

Atlantic Oceanographic and Meteorological Laboratory

TEACHING EXPERIENCE

- Co-organizer and Instructor
High Performance Computing and Data Analysis Workshop

October 2024

- Calculus Instructor
MIT-WHOI Joint Program Summer Math Refresher

June 2024

- Partial Differential Equations Instructor
MIT-WHOI Joint Program Summer Math Refresher

July 2023

PROFESSIONAL ACTIVITIES

- Committee Member
AMS Committee on Climate Variability and Change

2024–Present

- Graduate Application Mentor
Joint Program Applicant Support & Knowledgebase

2023–Present

- Physical Oceanography Representative
WHOI Joint Program Student Representative

2023–2024

- Conference Co-Organizer
2023 Graduate Climate Conference

2023

- At-Large Representative
WHOI Joint Program Student Representative

2022–2023

- Conference Co-Organizer
2022 First Generation Summit

2022

- Committee Member
UC Irvine Mathematics Inclusive Excellence Committee

2020–2021

WORKSHOPS AND SUMMER SCHOOLS ATTENDED

- CESM/MOM6 Regional Modeling Workshop
NCAR Mesa Laboratory, Boulder, CO

May 2025

- ECCO Summer School
Asilomar Conference Center, Monterey, CA

May 2025

- Tracer Mixing in Fluids Across Planetary Scales Summer School
Brin Mathematics Research Center, College Park, MD

Jul 2024

PRESENTATIONS
